Page 01100-5, paragraph 6. Add the following subparagraph at the end of the paragraph:

"l. Notice of Hazardous and Toxic Waste. The State of Louisiana's Department of Environmental Quality (DEQ) has classified Devil's Swamp as a Hazardous, Toxic and Radioactive Waste (HTRW) Site. Devil's Swap surrounds the project site on the north, west and east sides. Based on field investigations, soil samples, historical research, environmental database searches and interviews, it has been determined that conditions at the construction site are unlikely to present a potential for encountering situations that would require upgrades to levels of personal protective equipment greater than Level D (as described in 29 CFR 1910.120). Typical Level D protection includes standard equipment for most construction sites including hardhat, work boots with steel shank and toe, and long pants. Where the rock dike ties into the bank line, dust generation should be kept to a minimal, and dust masks worn by construction personnel."
